

**Amendment to the Specification**

In the English translation document at page 7, line 4 insert please the following new paragraph:

The liner-like lugs 10 protrude from rail elements 6, as shown in Figures 3 and 4. The rail element 6 is secured to the casing 7 of the combustion chamber 1, as shown in Figure 2. The rail element 6 is also sealed against the liner elements 5 by sealing element 16, as shown in Figures 3 and 4, thus the liner elements 5 are secured to the casing 7 via their attachment to the rail element 6.
